CALISCC SUPPLIERS' DAY 2025

Surprising Insights!

Building on Legacy, Creating a Future Together

2025 Suppliers' Day Chair, California Chapter of the Society of Cosmetic Chemists
and Business Director-Western US at Sunjin Beauty Science USA

Dear Valued Guests, Speakers, Sponsors, Exhibitors, and Industry Innovators,

Suppliers' Day 2025 in Long Beach is the chapter's marquee event, attracting local and international attendees eager to learn, collaborate, and shape the future of cosmetic science. What began as a tabletop gathering in the Proud Bird parking lot near LAX has grown into a dynamic, educational, and hands-on show floor experience. Angie Inouye likes to say "This show stands as the leading trade event for the personal care industry, bringing together the full spectrum of suppliers to showcase groundbreaking ingredients and innovative technologies. It is a true reflection of the creativity, progress, and excellence driving our industry forward".

We invite all attendees to actively engage with your ingredient, packaging, and equipment suppliers. These partners are here to collaborate, share insights, and bring solutions that can make your work more innovative and efficient. Visit the booths, ask questions, and explore how new ideas can benefit your projects. The California Chapter of the Society of Cosmetic Chemists is the second largest of 19 chapters with over 900 members committed to continuous education in cosmetic sciences and professional development. Did you know the California Chapter serves Oregon, Washington, Nevada, Arizona, and California states? The Western states are known for their disruptive, forward-thinking approach, not just our beautiful weather.

Bringing the Show to Life

I recall Angie Inouye explaining how Suppliers' Day began. Today, she continues as my mentor for the event, sharing her experience and wisdom. My involvement began with volunteering in 2021 and shadowing in 2023, culminating in the honor of stepping into Angie's role. If you know me, you know I am passionate about creating opportunities for others, which led me to assemble a committee including Velvet Arriola and Dr. Ryan Kudla. Individually, they are exceptional, but together with Angie and me, we have amplified our collective impact. We partnered with ECMA for the last months leading up to the show to manage logistics efficiently. Their services allow us to expand our volunteer engagement more strategically. We are also discussing the possibility of hosting the 2027 show earlier in October, changing venues, and most importantly enhancing the experience for attendees, exhibitors, sponsors, speakers, and show partners to drive attendance and participation.

Who mentored Angie, you might ask? None other than Brad Rope. For over 30 years, Angie has been part of Cali SCC Suppliers' Day. Under Brad's guidance, she spent her early years learning the significance of the show to the industry. After a decade, she took on producing the event and grew it for the next 20 years. During that time, she expanded its reach and impact, introducing free educational sessions and conferences giving attendees greater access to knowledge, innovation, and industry expertise. Angie finds it deeply rewarding to keep exhibiting costs affordable for all companies large and small. She has seen the show grow from Tabletops to large exhibits. As the show evolved, it grew substantially in scale and influence, establishing itself as a premier platform for the personal care community. Angie will tell you there were ups and downs. An upside was Angie collaborating with all suppliers to have one after party that is now a go-to event (Great idea Stephanie Leshney). A down was the year our venue was torn down and turned into a parking lot, forcing Angie to scramble to find a new venue in a few months was challenging. That show was a success, and we outgrew the Pasadena Convention Center that year with exhibits overflowing into the lobby. As Angie now pass the baton to me, she is looking forward to seeing the show continue to set the standard for excellence and growth in the years ahead. There are dozens of other volunteers behind the scenes including our financial team Catalina Bravo and Chapter Treasurer Stephanie Facuri, 2025 Chapter Chair Brittney Strickland, and the amazing webmasters Jay Haddad and previously Bruce Salgado.

What's in Store for the Cali SCC Suppliers' Day 2025 Show?

We have two full days including an after-party on day one designed to bring everyone together in one place. Suppliers' Day is also about connection. Join us at the After-Party in the evening of day one and see Velvet's vision come to life. "Honoring the past, acknowledging the present and looking forward to the future... this perfectly sums up my experience as part of the Suppliers' Day Committee and After Party Chair. Definitely looking forward to the CASC Suppliers' Day Afterparty the most, I mean who wouldn't want to join in on an epic hoedown throwdown. So dust off your boots, saddle up and join us on this Western Fiesta!" said Velvet.

- Day 0: Tuesday before show – booth set up followed by exhibitors' reception
National hosting two CEP courses 9 am to 5 pm PST held Tuesday, October 28 located in 103 Rooms at LBCC
 1. Mastering Makeup Formulation Across Eyes, Lips, and Face: Instructors: Paul Marotta and Brandon Nazario
 2. The Beauty Product Development Journey: Bridging Marketing & Technical Teams: Instructors: Cherie Buziak and Geri Sanowski
- Day 1 kicks off at 9 AM, with a keynote from Dr. Michelle Wong located in the Keynote Speaker room upstairs.
 - First time ever at CASC Suppliers' Day: Future Cosmetics Workshop (registration confirmed in advance)
 - Independent Beauty Association will host the IBA Studio
 - Floor Speakers diving into current trends and technologies around exosomes, longevity, and sensitive skin formulation.
 - After-party (separate ticket required) located at the nearby Pacific Ballroom at Long Beach Arena. This year's theme is "StageCoach: Cali SCC Edition".Don't forget to breakin your cowboy boots!
- Day 2, panel moderated by Jen Novakovich from The Eco Well & BeautySciComm on *Truth in Beauty: Impact of Misinformation on Cosmetic Policymaking*.
 - We partnered with the IBA to provide a series of floor sessions with regulatory bodies responsible for creating, implementing, and enforcing oversight and regulation of the cosmetics and personal care products industry.
 - 'Meet Your Regulators': Full-day sessions curated by IBA and sponsored by Cali SCC will include key regulatory agencies CARB, DTSC, OEHHA, and NAD.And so much more!!!

California Chapter Updates

The California Chapter was busy the past two years. In the fall of 2021, during a transition meeting between Ryan and I, we wrote out the initial concept for the first cosmetic science degree program in the Western US. We reached out to UC Riverside with our program concept. Dr. Kerry Hanson believed in our vision and became an advocate in building a program from the ground up. In a recent email from Kerry she shared, "we had our year 2 Emulsion and Surfactant Tech lab this weekend, which was just a delight. The students were so engaged, interested, and committed, and all came with such a positive and playful attitude. I was thrilled. Thank you!!!!" Ryan and I laid the foundation for scholarships, a program he continues to build out! Our scholarship at UCR is endowed, poised for longevity! Great things happen when everyone maintains a growth mindset and that includes Valerie George, who served on the inaugural Advisory Committee at UCR. Liz and I spent over a year building a mentorship program for the California Chapter, ultimately deciding it needed to be at the national level to benefit smaller chapters with limited resources. We hope to see you at the next chapter meeting.

- UCR: The University of California, Department of Chemistry, in collaboration with UCR Extension, offers the West Coast's first lab-based Professional Certificate in Cosmetic Chemistry. This 13-unit, 12-month hybrid program is endorsed by the California Society of Cosmetic Chemists and combines online instruction with over 48 hours (during the weekends) of hands-on laboratory work, covering Emulsion & Surfactant Technology and Product Development with an independent formulation project. All courses are taught by industry professionals who understand the innovative spirit that the West Coast brings to the industry. Students gain experience using industry-standard equipment in an advanced teaching lab dedicated to Cosmetic Chemistry, including mixers, viscometers, specific gravity cups, homogenizers, and microscopes. The program bridges the academic rigor expected by the University of California with real-world skill building. Students include those who are interested in joining the industry for the first time, while others, currently work in the field, use the program as a "bootcamp" to dramatically lower their learning curve. All students leave with both conceptual knowledge and practical skills to innovate in the rapidly evolving cosmetics and personal care industry.
 - For more information visit UCR's Cosmetic Chemistry page at <https://sites.google.com/ucr.edu/ucrchem-cosmetic-chemistry/ucr-cosmetic-chemistry>.
- UCLA: Beauty professionals from all genres and areas of expertise will find this three-part course series essential for understanding basic skincare ingredient technologies and U.S. regulations – regardless of scientific background.
 - Part I introduces students to the concepts of natural, synthetic, and organic ingredients. Students will learn about the claims legally allowed for cosmetics and drugs in the U.S., how to read ingredient lists, and receive an overview of basic ingredients used in skincare systems.
 - Part II offers an in-depth look at the causes, physiology and biochemical, of common skin conditions. Currently technologies found in cosmetics and OTC drugs are discussed, as well as technologies emerging from research labs around the world for these skin condition.
 - Part III examines the effects of internal and external factors on the skin's aging processes at cellular and tissue levels. Age-fighting ingredients currently found in cosmetics, and technologies emerging from research labs around the world, are discussed within the framework of aging skin.
 - For morning information visit UCLA Extensions website, <https://www.uclaextension.edu/>, and search for Cosmetic Professionals.
- Scholarships: CASC is proud to announce our first ever scholarship program fully administered by our in-house educational committee. Scholarship values range from \$500 to \$5,000 and support members through several initiatives including attending events outside of their traditional area and improving their work skills. We are most excited to partner with Arielle's Light to normalize mental health conversations in the cosmetic science community and support individuals championing mental health in the cosmetic science field.
 - Scholarships have officially launched at https://caliscc.org/Scholarship_Opportunities!

Do You Want to Volunteer?

Why am I so passionate about volunteering and mentorship? Linda Garcia, Liz Streland, and Laura Morrisson shaped my early career through their insights and mentorship, and we've become lifelong friends. Pat Mayer continues to be an inspiration to me in my new role at Sunjin; because we never stop learning. Knowing I can never repay them, I have chosen to pay it forward by helping others through volunteerism and community. I learned early in my career there is a difference between "being in a community" and "being a community". Volunteering ten hours per year can have a lasting impact including new friendships. Presently two of our very own West Coast baddies Ava Perkins and Nasrat Hamid are creating new avenues for opportunity, ensuring the next generation is prepared and supported. Nasrat took NexGen into 24 colleges and universities as well as STEM events. Ava Perkins is a well-known sci-communicator and speaker who teaches the Future Chemist Workshop all while working on her doctorate. You think this is amazing? You should see what their mentors continue to accomplish!

Ryan sums up volunteering very well, "it has been so rewarding for me to volunteer in the SCC. Not only has it allowed me to make friends I know I'll have for the rest of my life, but I love being able to give back to the community that has already given me so much. Whether it be seeing the excitement on a student's face when they make their first stable formula. Or having someone come up to me after a monthly meeting and saying the talk changed the way they formulate or think about product development. There's a piece to giving back that is indescribable, and I'm excited to see what people have to say about what we've cooked up at this year's Supplier's Day!"

Meet the 2025 Suppliers' Day Committee

- Margarita Gomez-Nadin, Cali SCC Suppliers' Day Chair, and Regional Sales Director-Western US at Sunjin Beauty Science loves forging uncharted paths, helped create the first West Coast cosmetic science degree at UC Riverside, served on its inaugural Advisory Committee, and helped establish a scholarship endowment. Served as 2022 Chair of the California Chapter, inaugural Chair for the Madam C.J. Walker Scholarship, inaugural Chair of the National Society's Diversity, Equity & Inclusivity Committee, and past President of Beauty Industry West, reinstating the FIDM scholarship for aspiring beauty professionals. A former pre-pharmacy student who discovered a passion for cosmetic science, Margarita holds a dual MBA from the University of La Verne (Leo for Life!).
- Velvet Arriola, Cali SCC Suppliers' Day After Party Chair, and Marketing Manager at Norman Fox is a USC and Pepperdine graduate, Velvet is a visionary in marketing, building lasting relationships with customers, partners, employees, and the broader community.
- Ryan Kudla, Cali SCC Educational Chair, Account Manager for the Western Region at Barnet Products, started as a Solid-State NMR Spectroscopist turned Cosmetic Chemist. Former Chapter Chair, 2021, he was instrumental in creating the first chemistry-focused cosmetic science certificate program and scholarships in the Western US.
- Angie Inouye, Advisor to Cali SCC Suppliers' Day committee, and Senior Sales Account Manager for Care at LBB Specialties. In addition to serving as SCC Suppliers Day Chair for over two decades, she has held several Chapter Officer positions including California Chair 2014, Chair Elect, and most recently completing her term as National Area III Director. Angie served many Chapter Committees such as Dinner Dance, Summer Events, Golf Tournaments, and Continuing Education Course. And our phenomenal Suppliers Day Chair extraordinaire. She is a Merit Award Winner. The honor of participating in the growth of the Society of Cosmetic Chemists organization has been a great experience to Angie. Her involvement with the California Chapter for almost 30 years has allowed her to have seen the challenges and contributed to the changes and solutions to grow. She appreciates the opportunity to assist in the future of our organization.

Community and Connection

We sincerely thank our attendees, members, exhibitors, sponsors, volunteers, trade publications, and partner companies whose support makes Suppliers' Day possible. Cali SCC would like to also thank the companies supporting their teams' participation this year show and chapter events throughout the year. Please allow me to thank Sunjin Beauty Science for supporting my volunteering.

Your engagement keeps this community thriving. Our hope is to inspire members to engage more deeply and consider volunteering. The strength of our community is what makes the show a success, you make this show a success. Together we can create an inspiring and unforgettable Suppliers' Day 2025, packed with Science, Sun, and Surprising Insights that push the boundaries of cosmetic innovation.

Sincerely,
Margarita Gomez-Nadin

CutiGuard CLR™

Timeless beauty at first sight

To truly make a difference for consumers, an active ingredient's performance should not only be scientifically proven but also visibly perceivable. CutiGuard CLR™ offers an innovative solution for resilient and visibly youthful skin.

- Makes skin look visibly younger and more attractive at first sight, demonstrated in an industry's first 'first impressions' study
- Improves skin tone evenness, radiance and youthfulness, confirmed by international make-up artists
- Reduces crow's feet after 14 days
- Transfers the adaptivity and resilience of an extremophilic red alga to skin cells
- Acts strongly on most relevant cell biological events during skin aging preserving a youthful skin functionality
- Effectively influences vital cell biological processes encompassing GATA4, HMGB1 and selective autophagy

Sustainability, mutual trust and reliability are key to our partnerships with manufacturers.

The most powerful peptides in the universe. Probably.

Activated Silk™ 33B-*a* and 27P-*a* bioactive peptides are the two most powerful peptides in the skincare universe. Because they support the two most important proteins keeping your skin looking and feeling healthy.

Activated Silk™ 27P-*a* is the only naturally derived, collagen-boosting peptide on the market that's clinically proven to deliver visibly firmer, brighter and smoother skin.* Unlike retinols that only stabilize collagen and lead to terminal differentiation of cells, Activated Silk™ 27P-*a* turns the skin on to support the natural production of new collagen Type-1.

Activated Silk™ 33B-*a* supports the natural production of claudin. This lesser known protein improves your barrier's ability to maintain tight junctions between cells, so fewer stressors get in and less moisture gets out. Activated Silk™ 33B-*a* also stays on the skin after rinsing, so it can effectively be delivered in rinse-off products like soaps and cleansers.

Clinically proven and scientifically explained at
bioactives.evolvedbynature.com

Visit us at CA SCC Suppliers' Day | Booth #587

*Based on a clinical study of 19 subjects using 0.5% Activated Silk™

*EVOLVED BY NATURE™
